FAQs

1. Is our farm organic-certified?

PIJM is privileged to have its farm located in Bio Desaru, an organic food valley gazetted by the Johor State Government of Malaysia. It is the first of its kind in Malaysia and in the region with Bio-Security as the thrust of its inception. Our farm is in the process towards achieving MyOrganic Malaysia certificate which will give a recognition to the farm that practices organic farming according to Malaysian Standard MS 1529 : 2015 Plant - based foods produced organically - requirements for production, processing, handling, labeling and marketing (First Revision).

2. Does your aloe vera extract undergo cold process method?

No, instead our aloe vera juice goes through Pasteurization method, a heat-treatment process that destroys pathogenic microorganisms to make the juice safe for our consumption.

3. What are the most important components of Aloe vera?

The most potent constituent in aloe vera leaves is Polysaccharides which contain Acemannan, pronounced "ace-man-nan". Acemannan is a D-somer mucopolysaccharide in the aloe vera leaves. This compound has been known to have immunostimulant, antiviral, antineoplastic and gastrointestinal properties. Acemannan has many nutritional qualities and is largely responsible for the benefits aloe vera offers.

4. What is the best pH of Aloe Vera Juice?

3.5-5.0

5. Can I mix aloe vera with other juices?

You can mix the aloe vera with other juices especially plant based/citrus juices without harming the potency. However, aloe vera is not suitable to be mixed with cocoa & coffee.

6. Are there any side-effects consuming the aloe vera juice?

So far, there are no side-effects from consuming the aloe vera juice.

7. Why does your aloe taste bitter while others taste like water?

All true aloe vera juice have its distinctive taste. Our aloe vera juice have a vegetable-like taste. Aloe vera juice that taste like water may have been fractionally-distilled, where the solid portions of the plants with the biologically active components have been removed.

8. How much aloe vera should I drink the aloe vera juice?

For adult, it is recommended to consume twice a day. The dosage is 50ml before breakfast (on empty stomach) and 50ml before bedtime. **Caution: Do Not Consume If Pregnant Or Breastfeeding.**

9. What are appropriate consumption guidelines for kids?

For kids, the dosage is 30ml before breakfast (on empty stomach) and 30ml before bedtime.

10. When should I feel some benefits from consuming the aloe vera juice?

The benefits vary from one individual to another. The effects also depend on the individual body immune system. Normally, you can experience the result within a week.
